Date	Number of Hours	Description of work done
Oct 3, 2025	2	Finish get data from MySQL
Oct 4, 2025	4	Finish Daily Player performance model
Oct 8, 2025	3	Finish Change feature function and edit model
Oct 9, 2025	4	Finish Daily Vehicle performance model,
Oct 10, 2025	4	Finish WebSocket/http connection, try to run multiple files at the same time.
Oct 11, 2025	3	Discuss with teammates about server, function change, database change.

Last week I first try to use python to get data from MySQL. Then I finish Two models, for those two models, I all use logistic regression. On Oct 10, I create a file to connect with WebSocket and http request and return data, but on Oct 11, after we discuss about the function, we give up using WebSocket and storage data in database, and we make a small change on data structure.

The folders I have checked in the repo are as follows:
implementation/dataAnalysisPrograms
